## Daily Dilemma \#14: Activity

Name $\qquad$ Date $\qquad$

1. Catherine, Annette, Kim, and Alyssa each wanted an equal portion of the birthday cake. Which picture represents the cake already divided so that each girl would get an equal number of pieces? 2 pts.

Explain how you solved this problem.
2. Mrs. Davis wanted to rent an SUV for 1 week to drive a total of 230 km . What was the total cost of renting the SUV? (2 pts.)

Work:
Answer: $\qquad$

| Bill's Auto Rental |  |
| :--- | :--- |
| $\$ 30.00$ per day | All Vehicles |
| $\$ 0.14 / \mathrm{km}$ | Sedan |
| $\$ 0.16 / \mathrm{km}$ | Van |
| $\$ 0.22 / \mathrm{km}$ | SUV |

3. Kyle, Chris, and Blayne bought an old bicycle for $\$ 12.00$. To repair the bicycle, they purchased a new tire for $\$ 6.33$, a new chain for $\$ 2.46$, and a can of spray paint for $\$ 4.50$. They then sold the bicycle for $\$ 38.10$ and shared the profit equally, how much did each of the boys make? (2 pts)

Work:
Answer: $\qquad$
4. One lovely spring day a group of boy scouts decided to meet at the school to go to the fair. At 8:00 A.M. Graham was standing on the school's front steps. At 8:01, five boys were on the steps, at 8:02, there were 9 boys, and at 8:03, there were 13 boys. They decided to head out to the fair at exactly $8: 10$. If the pattern is followed, how many boy scouts leave for the fair at 8:10? (2 pts.)

Work:
Answer: $\qquad$

Extra credit: (1pt) What's the rule?
5. Chelsea was eating a bowl of Campbell's Alphabet Soup. Unfortunately, she got distracted, her spoon missed her mouth, and the soup spilled. The J flipped to the right halfway to the table.

Draw the J after it flipped here. (1pt)

It then continued to fall and rotated 90 degrees counterclockwise.
Now draw the J after it rotated 90 degrees counterclockwise. (1pt)
6. Extra Credit: The length of Tim's bedroom is $13^{\prime}$ and the width is 15 '. If Tim wants to carpet his bedroom, how many square feet of carpet does Tim need to buy? (1pt)

If Tim wants to put a border around the top of the walls next to the ceiling, how much border should he buy? (1pt)

The magic numbers are: $\quad 306.87$ w/o extra credit 557.87 w/ extra credit
