LORAN-C GENERAL EXPLANATION

GENERAL EXPLANATION
 LORAN-C is a radio navigation system which provides accurate position information to ships and aircraft. It consists of a series of ground stations and a receiver on the user's vessel or aircraft. The receiver measures the time delay between the reception of signals from two or more ground stations and uses this information to determine the user's position.

DATES ON THIS CHART

1970-11 1970-12 1971-01 1971-02
 The chart has been amended on the above dates. The most recent edition is shown in the upper right corner of the chart. The date of the most recent edition is 1977-05-05.
