

Produced by the United States Geological Survey and the National Ocean Service
Control by USGS and NOS/NOAA
Culture and drainage in part compiled from aerial photographs taken 1971-1982. Topography from aneroid surveys, 1956
Bathymetry compiled by the National Ocean Service from side-scaned hydrographic surveys. This information is not intended for navigational purposes.
Mean lower low water dashed line and mean high water heavy solid line compiled by NOS from side-scaned aerial photographs
Aspen and thicket forest edge of vegetation shown by light solid line
1:000-foot grid ticks based on Florida coordinate system, east zone
1000-meter Universal Transverse Mercator grid ticks, zone 17 shown in blue
To place on the predicted North American Datum 1983, move the projection lines 38 meters south and 17 meters west as shown by dashed corner ticks
Dashed land lines indicate approximate locations
Purple line indicates extension of urban areas
Reasons shown in purple and woodred compiled in cooperation with State of Florida agencies from aerial photographs taken 1984 and other sources. This information not field checked. Map edited 1987
