

1. Dryland  
2. Wetland (May be subject to tidal action at mean high tide)  
3. Exposed at mean low tide

Produced by the Geological Survey and the National Ocean Survey  
Control by the USGS and NOS/NOAA  
Orthophotomaps prepared by the Geological Survey from aerial photographs taken January 28, 1976. Topography by photogrammetric methods from aerial photographs taken January 1975 and planimetric surveys 1978. Field checked 1978.  
Supersedes topographic map dated 1962.  
Bathymetry compiled by the National Ocean Survey from tide-coordinated bathymetric surveys.  
Soundings compiled from NOS chart 1386.  
This information is not intended for navigational purposes.  
Mean low water (dashed line and mean high water (solid line) implied by NOS from tide-coordinated aerial photographs by photogrammetry (lower edge of experiment above).  
Projection and 10,000-foot grid ticks: Florida coordinate north, with area (datum: geoid), zone 16, 1983 North American Datum.  
To align on the projected North American Datum 1983 upon the projection line 21 centimeters north and 9 meters west as shown by dashed corner ticks.  
Dotted line lines established by private subdivisions of the Forbes Purchase.  
There may be private subdivisions within the boundaries of the National or State reservations shown on this map.
