The diagram on this map is based on information provided by the Florida Geological Survey. The map shows the geographic and topographic features of the state of Florida. It includes the location of the Everglades, the Panhandle, and other major geographic regions. The map also highlights areas of interest such as the Gulf of Mexico and the Atlantic Ocean.

The map is a valuable resource for understanding the natural features and potential resources of Florida. It can be used for planning and development, as well as for educational purposes. The map is available for download from the Maps ETC website at http://etc.usf.edu/maps [map #f3888].
