

EXPLANATION

-  STUDY AREA BOUNDARY
-  UNCONFINED—Areas where the Upper Floridan aquifer is unconfined and the top of the aquifer is at (or near) land surface. The dominant land form is karst
-  CONFINED—Areas where the Upper Floridan aquifer is confined by low-permeability Miocene- and Pliocene-age sediments
-  UNCONFINED—Areas where the Upper Floridan aquifer is overlain but not confined by low-permeability Miocene- and Pliocene-age sediments
-  BARWICK ARCH
