## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 3

**A122:** relative size of numbers (pp 41-42)  
**A124:** equivalent forms of numbers (p 49), includes A121 (names of numbers),  
A123 (concrete and symbolic representations of numbers)  
**A221:** place value concepts (p 55)  
**A321:** effects of operations on numbers (p 60)  
**A322:** appropriate operation to solve a specific problem (p 64)  
**A323:** appropriate methods of computing (p 68)  
**A421:** estimation strategies (p 72) - includes B321 (estimates of measurements)  
**A521:** basic number theory concepts including primes, composites, factors, and multiples (p 78)

Number Sense,  
Concepts, and  
Operations

**B122:** real-world problems involving length, weight, perimeter, area, capacity, volume,  
time, temperature, and angles (pp 82-83)  
**B221:** direct and indirect measures (p 90)  
**B222:** appropriate standard and nonstandard units of measurement (p 96) - includes B421 (which units to use with  
answers to real-world problems)  
**B422:** appropriate instruments and technology to measure in real-world situations (pp 101-102)

Measurement

**C121:** appropriate geometric vocabulary to draw and describe 2- and 3-D shapes (p 108)  
**C221:** spatial relationships, symmetry, reflections, congruency, and similarity (p 113), includes B122, C121, C321, (see  
chart)  
**C222:** flips, slides, and turns (p 119)  
**C321:** strategies, properties, and formulas to solve real-world problems involving  
2- and 3-D shapes (pp 125-126), includes C221 (see chart)  
**C322:** positive ordered pairs in a rectangular coordinate system (pp 134-135)

Geometry and  
Spatial Sense

**D121:** patterns and relationships using models (pp 142-143)  
**D221:** represent a given simple problem situation (pp 156-157), includes D222 (see chart)  
**D222:** informal methods to solve equations and inequalities (p 163), includes D221 (see chart)

Algebraic Thinking

**E121:** generate, collect, organize, display, and analyze data to solve problems (pp 170-171) - includes E123  
(analyzes real world data)  
**E122:** range, mean, median, and mode (p 183) - includes E123 (see E121)  
**E221:** display possible outcomes using models (p 189)  
**E222:** predict the likelihood of simple events occurring (p 194)

Data Analysis and  
Probability

All FCAT math items at Grade 3 are tested in multiple choice format  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 4

A122: relative size of numbers (pp 43-44)  
A124: equivalent forms of numbers (pp 50-51), includes A121 (names of numbers),  
A123 (concrete and symbolic representations of numbers)  
A221: place value concepts (p 56)  
A321: effects of operations on numbers (p 61)  
A322: appropriate operation to solve a specific problem (p 65)  
A323: appropriate methods of computing (p 69)  
A421: estimation strategies (p 73) - includes B321 (estimates of measurements)  
A521: basic number theory concepts including primes, composites, factors, and multiples (p 79)

Number Sense,  
Concepts, and  
Operations

B122: real-world problems involving length, weight, perimeter, area, capacity, volume,  
time, temperature, and angles (pp 84-85)  
B221: direct and indirect measures (p 91)  
B222: appropriate standard and nonstandard units of measurement (pp 97-98) - includes B421 (which units to use with  
answers to real-world problems)  
B422: appropriate instruments and technology to measure in real-world situations (pp 103-104)

Measurement

C121: appropriate geometric vocabulary to draw and describe 2- and 3-D shapes (p 109)  
C221: spatial relationships, symmetry, reflections, congruency, and similarity (p 114), includes B122, C121, C321, (see  
chart)  
C222: flips, slides, and turns (pp 120-121)  
C321: strategies, properties, and formulas to solve real-world problems involving  
2- and 3-D shapes (pp 127-128), includes C221 (see chart)  
C322: positive ordered pairs in a rectangular coordinate system (p 136)

Geometry and  
Spatial Sense

D121: patterns and relationships using models (pp 144-145)  
D221: represent a given simple problem situation (p 158), includes D222 (see chart)  
D222: informal methods to solve equations and inequalities (pp 164-165), includes D221 (see chart)

Algebraic Thinking

E121: generate, collect, organize, display, and analyze data to solve problems (pp 172-173),  
includes E123 (analyzes real world data)  
E122: range, mean, median, and mode (pp 184-185) - includes E123 (see E121)  
E221: display possible outcomes using models (p 190)  
E222: predict the likelihood of simple events occurring (p 195)

Data Analysis and  
Probability

All FCAT math items at Grade 4 are tested in multiple choice format  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 5

A122: relative size of numbers (MC, GR) pp 45-47  
A124: equivalent forms of numbers (MC, GR) pp 52-53, includes A121 (names of numbers),  
A123 (concrete and symbolic representations of numbers)  
A221: place value concepts (GR) pp 57-58  
A321: effects of operations on numbers (MC) p 62  
A322: appropriate operation to solve a specific problem (MC) p 66  
A323: appropriate methods of computing (MC, GR) p 70  
A421: estimation strategies (SR) pp 74-76, includes B321 (estimates of measurements)  
A521: basic number theory concepts including primes, composites, factors, and multiples (MC) p 80

Number Sense,  
Concepts, and  
Operations

B122: real-world problems involving length, weight, perimeter, area, capacity, volume,  
time, temperature, and angles (MC, GR) pp 86-88  
B221: direct and indirect measures (MC, GR) pp 92-94  
B222: appropriate standard and nonstandard units of measurement (MC) p 99, includes B421 (which units to use with  
answers to real-world problems)  
B422: appropriate instruments and technology to measure in real-world situations (MC) pp 105-106

Measurement

C121: appropriate geometric vocabulary to draw and describe 2- and 3-D shapes (SR) pp 110-111  
C221: spatial relationships, symmetry, reflections, congruency, and similarity (MC, ER) pp 115-117,  
includes B122, C121, C321, (see chart)  
C222: flips, slides, and turns (MC) pp 122-123  
C321: strategies, properties, and formulas to solve real-world problems involving  
2- and 3-D shapes (MC, SR) pp 129-132, includes C221 (see chart)  
C322: positive ordered pairs in a rectangular coordinate system (MC, SR) pp 137-140

Geometry and  
Spatial Sense

D121: patterns and relationships using models (MC, GR) pp 146-148  
D122: generalize pattern, relation, or function to explain cause-and-effect (SR) pp 152-154,  
includes D121 (see chart)  
D221: represent a given simple problem situation (MC, SR) pp 159-161, includes D222 (see chart)  
D222: informal methods to solve equations and inequalities (MC, GR) pp 166-168, includes D221 (see chart)

Algebraic Thinking

E121: generate, collect, organize, display, and analyze data to solve problems (MC, GR, ER) pp 174-181,  
includes E123 (analyzes real world data)  
E122: range, mean, median, and mode (MC, GR) pp 186-187, includes E123 (see E121)  
E221: display possible outcomes using models (SR) pp 191-192  
E222: predict the likelihood of simple events occurring (MC) p 196  
E321: collect, organize, analyze, and display data (MC, SR) pp 200-203, includes E322 (uses data to make predictions)

Data Analysis and  
Probability

MC - multiple choice, GR - gridded response, SR - short response, ER - extended response  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 6

A132: relative size of numbers (MC) p 42  
A134: equivalent forms of numbers (MC, GR) pp 47-48, includes A131 (verbal and word names for numbers), A133 (concrete and symbolic representations of numbers)  
A231: exponential and scientific notation (MC, GR) pp 54-55  
A331: effects of operations on numbers (MC) p 61  
A332: order of operations (MC, GR) pp 65-66  
A333: appropriate methods of computing (MC, GR) pp 72-73  
A431: estimation strategies (MC) p 79, includes A421 (reasonableness of results), B231 (direct and indirect measurement), B331 (estimates of measurements)

Number Sense,  
Concepts, and  
Operations

B131: derive formulas for perimeter, area, surface area, circumference, or volume (MC, GR) pp 84-86, includes B122 (grades 3-5, real world measurement problems), B231 (see A431)  
B132: derive formulas for rate, distance, time, angle measures (MC, GR) p 96, includes B122 (see B131), B231 (see A431)  
B133: impact of change in one dimension on other measurements (MC, GR) pp 103-105, includes C231 (see chart)  
B134: real-world problems involving scale drawings (MC, GR) pp 113-115, includes B231 (see A431)  
B232: real-world problems involving conversions within the metric or customary system (MC, GR) pp 122-123

Measurement

C131: relationships and properties among regular and irregular shapes (MC, GR) pp 129-131, includes C121 (grades 3-5, draw or describe 2- and 3-dimensional shapes)  
C231: symmetry, reflections, congruency, similarity, perpendicularity, parallelism, and transformations (MC) pp 139-140, includes B133 (see chart), C121 (see C131), C131 (see chart), C331 (see chart)  
C331: real-world and mathematical problems involving geometric properties and relationships (MC) pp 153-154, includes C231 (see chart)  
C332: rectangular coordinate system and simple properties of lines (MC) pp 163-164

Geometry and  
Spatial Sense

D131: patterns, relationships, and functions (MC, GR) pp 176-178, includes A531 (number sequences)  
D132: cause-and-effect relationships (MC, GR) pp 185-186, includes A531 (see D131)  
D231: algebraic expressions, equations, and inequalities (MC) p 197, includes A133 (see A134)  
D232: linear equations and inequalities (MC, GR) pp 203-204

Algebraic Thinking

E131: different ways of presenting data leading to different interpretations (MC, GR) pp 210-212, includes E133 (analyze and organize data in a quality display)  
E132: measures of central tendency and range (MC, GR) pp 225-227, includes E133 (see E131)  
E231: experimental results compared with mathematical expectations (MC) pp 235-236  
E232: odds for and odds against a given situation (MC) p 243, includes E222 (grades 3-5, predicts likelihood of simple events occurring)  
E331: inferences and conclusions based on statistics (MC) pp 248-249, includes E332 (common uses and misuses of statistics)

Data Analysis and  
Probability

All FCAT math items at Grade 6 are tested in multiple choice (MC) or gridded response (GR) format  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 7

A132: relative size of numbers (MC) p 43  
A134: equivalent forms of numbers (MC, GR) pp 49-50, includes A131 (verbal and word names for numbers), A133 (concrete and symbolic representations of numbers)  
A231: exponential and scientific notation (MC, GR) pp 56-57  
A331: effects of operations on numbers (MC) p 62  
A332: order of operations (MC, GR) pp 67-68  
A333: appropriate methods of computing (MC, GR) pp 74-75  
A431: estimation strategies (MC) p 80, includes A421 (reasonableness of results), B231 (direct and indirect measurement), B331 (estimates of measurements)

Number Sense,  
Concepts, and  
Operations

B131: derive formulas for perimeter, area, surface area, circumference, or volume (MC, GR) pp 87-89, includes B122 (grades 3-5, real world measurement problems), B231 (see A431)  
B132: derive formulas for rate, distance, time, angle measures (MC, GR) pp 97-99, includes B122 (see B131), B231 (see A431)  
B133: impact of change in one dimension on other measurements (MC, GR) pp 106-108, includes C231 (see chart)  
B134: real-world problems involving scale drawings (MC, GR) pp 116-117, includes B231 (see A431)  
B232: real-world problems involving conversions within the metric or customary system (MC, GR) pp 124-125

Measurement

C131: relationships and properties among regular and irregular shapes (MC, GR) pp 132-134, includes C121 (grades 3-5, draw or describe 2- and 3-dimensional shapes)  
C231: symmetry, reflections, congruency, similarity, perpendicularity, parallelism, and transformations (MC) p 141, includes B133 (see chart), C121 (see C131), C131 (see chart), C331 (see chart)  
C232: patterns involving tessellations (MC) p 150  
C331: real-world and mathematical problems involving geometric properties and relationships (MC) pp 155-156, includes C231 (see chart)  
C332: rectangular coordinate system and simple properties of lines (MC) pp 165-166

Geometry and  
Spatial Sense

D131: patterns, relationships, and functions (MC, GR) pp 179-181, includes A531 (number sequences)  
D132: cause-and-effect relationships (MC, GR) pp 187-189, includes A531 (see D131)  
D231: algebraic expressions, equations, and inequalities (MC) p 198, includes A133 (see A134)  
D232: linear equations and inequalities (MC, GR) pp 205-206

Algebraic Thinking

E131: different ways of presenting data leading to different interpretations (MC, GR) pp 213-215, includes E133 (analyze and organize data in a quality display)  
E132: measures of central tendency and range (MC, GR) pp 228-230, includes E133 (see E131)  
E231: experimental results compared with mathematical expectations (MC) pp 237-238  
E232: odds for and odds against a given situation (MC) p 244, includes E222 (grades 3-5, predicts likelihood of simple events occurring)  
E331: inferences and conclusions based on statistics (MC) p 250, includes E332 (common uses and misuses of statistics)

Data Analysis and  
Probability

All FCAT math items at Grade 7 are tested in multiple choice (MC) or gridded response (GR) format  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 8

A132: relative size of numbers (MC) pp 44-45  
A134: equivalent forms of numbers (MC, GR) pp 51-52, includes A131 (verbal and word names for numbers),  
A133 (concrete and symbolic representations of numbers)  
A231: exponential and scientific notation (MC, GR) pp 58-59  
A331: effects of operations on numbers (MC) p 63  
A332: order of operations (MC, GR) pp 69-70  
A333: appropriate methods of computing (MC, GR) pp 76-77  
A431: estimation strategies (SR) pp 81-82, includes A421 (reasonableness of results), B231 (direct and indirect measurement), B331 (estimates of measurements)

Number Sense,  
Concepts, and  
Operations

B131: derive formulas for perimeter, area, surface area, circumference, or volume (GR, SR) pp 90-94,  
includes B122 (grades 3-5, real world measurement problems), B231 (see A431)  
B132: derive formulas for rate, distance, time, angle measures (GR, SR) p 100-101, includes B122 (see B131), B231 (see A431)  
B133: impact of change in one dimension on other measurements (MC, GR) pp 109-111, includes C231 (see chart)  
B134: real-world problems involving scale drawings (MC, GR) pp 118-120, includes B231 (see A431)  
B232: real-world problems involving conversions within the metric or customary system (MC, GR) pp 126-127

Measurement

C131: relationships and properties among regular and irregular shapes (MC, GR) pp 135-137,  
includes C121 (grades 3-5, draw or describe 2- and 3-dimensional shapes)  
C231: symmetry, reflections, congruency, similarity, perpendicularity, parallelism, and  
transformations (MC, GR, ER) pp 142-147, includes B133 (see chart), C121 (see C131), C131 (see chart), C331  
(see chart)  
C232: patterns involving tessellations (MC) p 151  
C331: real-world and mathematical problems involving geometric properties and relationships (MC, SR) pp 157-161,  
includes C231 (see chart)  
C332: rectangular coordinate system and simple properties of lines (MC, SR) pp 167-174

Geometry and  
Spatial Sense

D131: patterns, relationships, and functions (MC, GR) pp 182-183, includes A531 (number sequences)  
D132: cause-and-effect relationships (MC, GR, SR) pp 190-195, includes A531 (see D131)  
D231: algebraic expressions, equations, and inequalities (MC, SR) p 199-201, includes A133 (see A134)  
D232: linear equations and inequalities (MC, GR) pp 207-208

Algebraic  
Thinking

E131: different ways of presenting data leading to different interpretations (MC, GR, ER) pp 216-223,  
includes E133 (analyze and organize data in a quality display)  
E132: measures of central tendency and range (MC, GR) pp 231-233, includes E133 (see E131)  
E231: experimental results compared with mathematical expectations (SR) pp 239-241  
E232: odds for and odds against a given situation (MC, GR) p 245-246, includes E222 (grades 3-5, predicts likelihood of  
simple events occurring)  
E331: inferences and conclusions based on statistics (MC, SR) pp 251-253, includes E332 (common uses and misuses of  
statistics)

Data Analysis and  
Probability

MC - multiple choice, GR - gridded response, SR - short response, ER - extended response  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 9

**A142: relative size of numbers (MC) p 40**

**A144: equivalent forms of numbers (MC, GR) pp 44-45, includes A141 (verbal and word names for numbers), A143 concrete and symbolic representations of numbers**

**A341: effects of operations on numbers (MC, GR) pp 49-50, includes A242 (real number system)**

**A342: properties of numbers as operational shortcuts (MC, GR) pp 54-55, includes A242 (see A341)**

**A343: appropriate methods of computing (MC, GR) pp 58-59, includes A242 (see A341)**

**A441: estimation strategies in complex situations (MC) pp 63-64, includes B341 (estimates of measurements)**

Number Sense,  
Concepts, and  
Operations

**B141: derive formulas for perimeter, area, surface area, circumference, or volume (MC, GR) pp 69-71, includes B122 (grades 3-5, real-world problems involving other common units of measure)**

**B142: derive formulas for rate, distance, time, angle measures, or arc lengths (MC, GR) pp 77-78, includes B122 (see B141)**

**B143: real-world problems involving similarity and proportionality (MC, GR) pp 84-86**

**B241: direct and indirect measurement (MC, GR) pp 89-90**

**B242: real-world problems involving rated measures (mph, fps) (MC, GR) pp 94-95, includes B232 (grades 6-8, problems and conversions within the metric or customary systems)**

Measurement

**C141: formal and informal proofs (MC, GR) pp 100-101, includes C121 (grades 3-5, describes/draws 2- and 3-D shapes), C131 (grades 6-8, basic properties of 2- and 3-D shapes)**

**C241: perpendicularity, parallelism, tangency, congruency, similarity, reflections, symmetry, and transformations (MC, GR) pp 109-111, includes B143, C141, C341 (see chart)**

**C341: ratio, proportion, right triangle geometry (MC) pp 124-126, includes C241 (see chart)**

**C342: algebraic properties in a rectangular coordinate system (MC, GR) pp 133-135, includes C332 (grades 6-8, ordered pairs and simple properties of lines), D241 (sequences and series)**

Geometry and  
Spatial Sense

**D141: relationships, patterns, and functions (MC, GR) pp 143-144**

**D142: impact when changing parameters of functions (MC, GR) pp 151-153**

**D242: systems of linear equations and inequalities (MC, GR) pp 158-160, includes D241 (see C342)**

Algebraic Thinking

**E141: interpret data from charts, tables, and plots (MC, GR) pp 169-171, includes E131 (grades 6-8, different ways of presenting data, leading to different interpretations), E143 (use of statistics to make predictions)**

**E142: measures of central tendency and dispersion (MC, GR) pp 182-184, includes E143 (see E141)**

**E241: probability, including permutations and combinations (MC, GR) pp 188-190, includes E242 (probability for simple and compound events)**

**E341: interpret data that results from statistical experiments (MC, GR) pp 195-197, includes E331 (grades 6-8, inferences and conclusions based on statistics), E342 (limitations of statistical techniques and data in making inferences)**

Data Analysis  
and Probability

All FCAT math items at Grade 9 are tested in multiple choice (MC) or gridded response (GR) format  
pp - Test Item and Performance Task Specifications pages

## SUMMARY OF BENCHMARKS ASSESSED ON FCAT - GRADE 10

A142: relative size of numbers (MC) pp 41-42  
A144: equivalent forms of numbers (MC, GR) pp 46-47, includes A141 (verbal and word names for numbers), A143 concrete and symbolic representations of numbers  
A341: effects of operations on numbers (MC, GR) pp 51-52, includes A242 (real number system)  
A342: properties of numbers as operational shortcuts (MC) p 56, includes A242 (see A341)  
A343: appropriate methods of computing (MC, GR) pp 60-61, includes A242 (see A341)  
A441: estimation strategies in complex situations (SR) pp 65-67, includes B341 (estimates of measurements)

Number Sense,  
Concepts, and  
Operations

B141: derive formulas for perimeter, area, surface area, circumference, or volume (GR, SR) pp 72-75, includes B122 (grades 3-5, real-world problems involving other common units of measure)  
B142: derive formulas for rate, distance, time, angle measures, or arc lengths (MC, SR) pp 79-82, includes B122 (see B141)  
B241: direct and indirect measurement (MC) pp 91-92  
B242: real-world problems involving rated measures (mph, fps) (MC, GR) pp 96-98, includes B232 (grades 6-8, problems and conversions within the metric or customary systems)

Measurement

C141: formal and informal proofs (MC, GR, SR) pp 102-107, includes C121 (grades 3-5: describes/draws 2- and 3-D shapes), C131 (grades 6-8, basic properties of 2- and 3-D shapes)  
C241: perpendicularity, parallelism, tangency, congruency, similarity, reflections, symmetry, and transformations (MC, GR, ER) pp 112-118, includes B143 (similarity and proportionality), C141, C341 (see chart)  
C242: planar cross sections (MC) pp 121-122  
C341: ratio, proportion, right triangle geometry (MC, SR) pp 127-131, includes C241 (see chart)  
C342: algebraic properties in a rectangular coordinate system (MC, GR, SR) pp 136-141, includes C332 (grades 6-8, ordered pairs and simple properties of lines), D241 (sequences and series)

Geometry and  
Spatial Sense

D141: relationships, patterns, and functions (MC, GR) pp 145-149  
D142: impact when changing parameters of functions (SR) pp 154-156  
D242: systems of linear equations and inequalities (MC, GR, SR) pp 161-167, includes D241 (see C342)

Algebraic Thinking

E141: interpret data from charts, tables, and plots (MC, GR, SR) pp 172-180, includes E131 (grades 6-8, different ways of presenting data, leading to different interpretations), E143 (use of statistics to make predictions)  
E142: measures of central tendency and dispersion (MC, GR) pp 185-186, includes E143 (see E141)  
E241: probability, including permutations and combinations (MC, GR) pp 191-193, includes E242 (probability for simple and compound events)  
E341: interpret data that results from statistical experiments (MC, GR, SR) pp 198-202, includes E331 (grades 6-8, inferences and conclusions based on statistics), E342 (limitations of statistical techniques and data in making inferences)

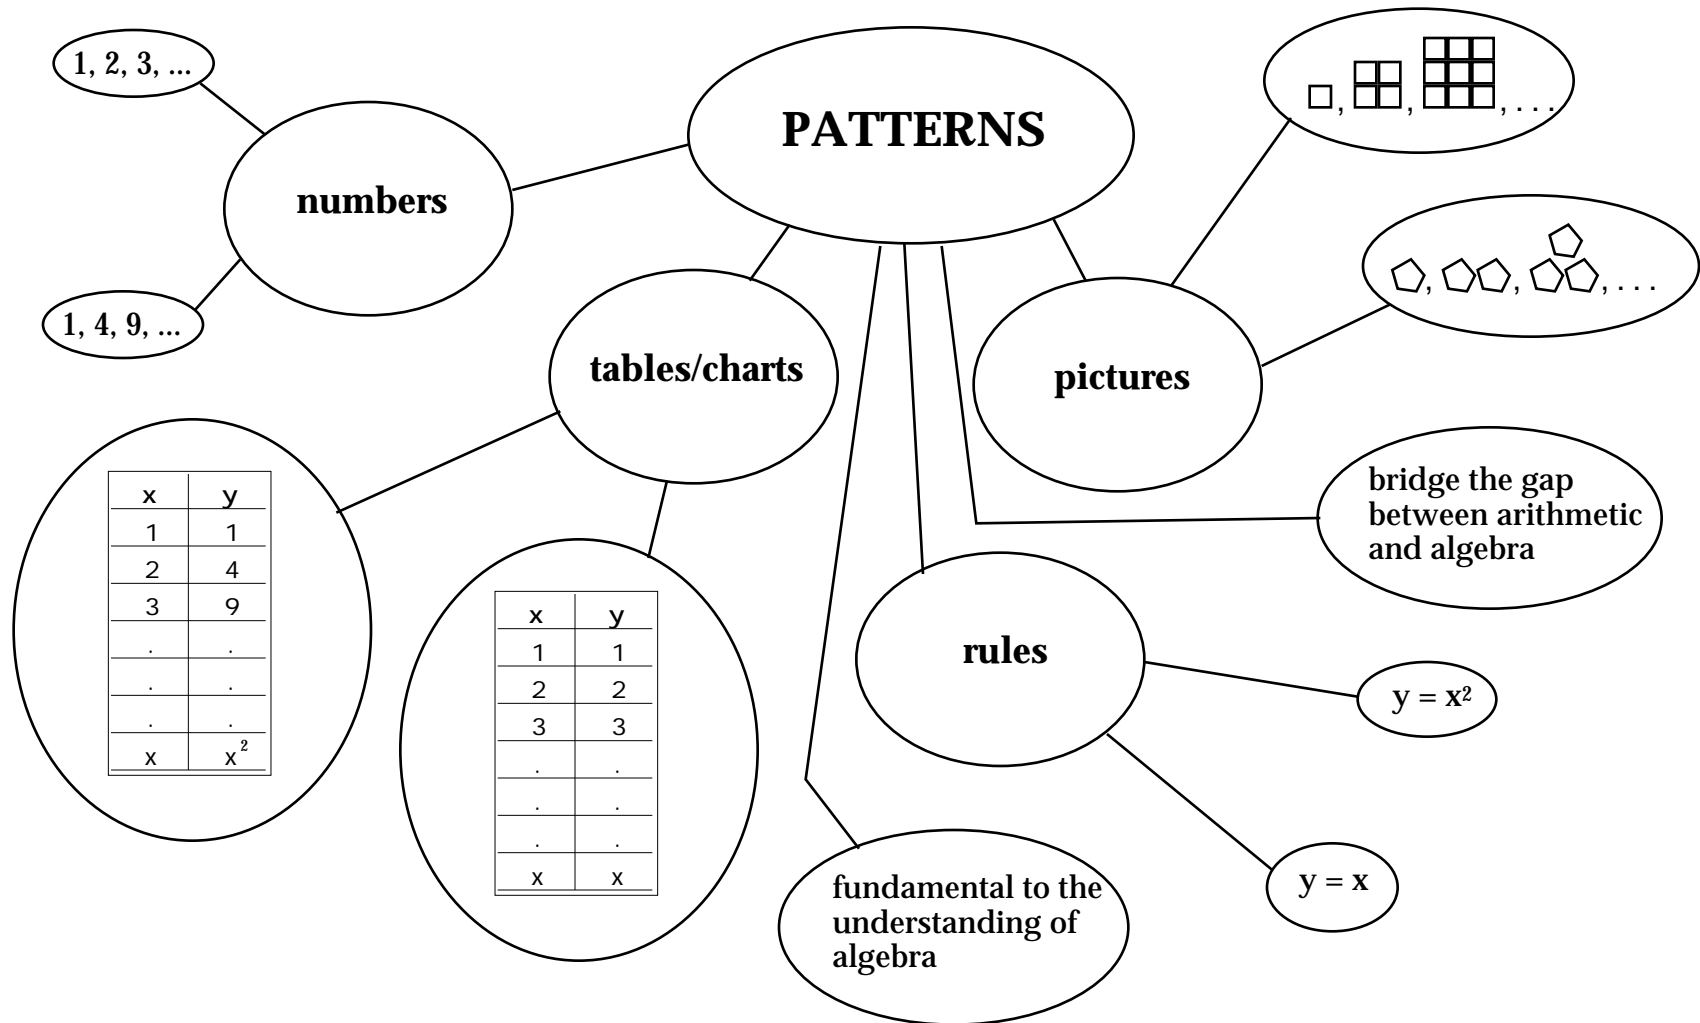

Data Analysis  
and Probability

MC - multiple choice, GR - gridded response, SR - short response, ER - extended response  
pp - Test Item and Performance Task Specifications pages

# ALGEBRAIC THINKING STRAND

# PATTERNS

**Patterns allow us to generalize relationships within a set of data.**

# VARIABLES and EXPRESSIONS

A variable is a symbol used to represent a value.

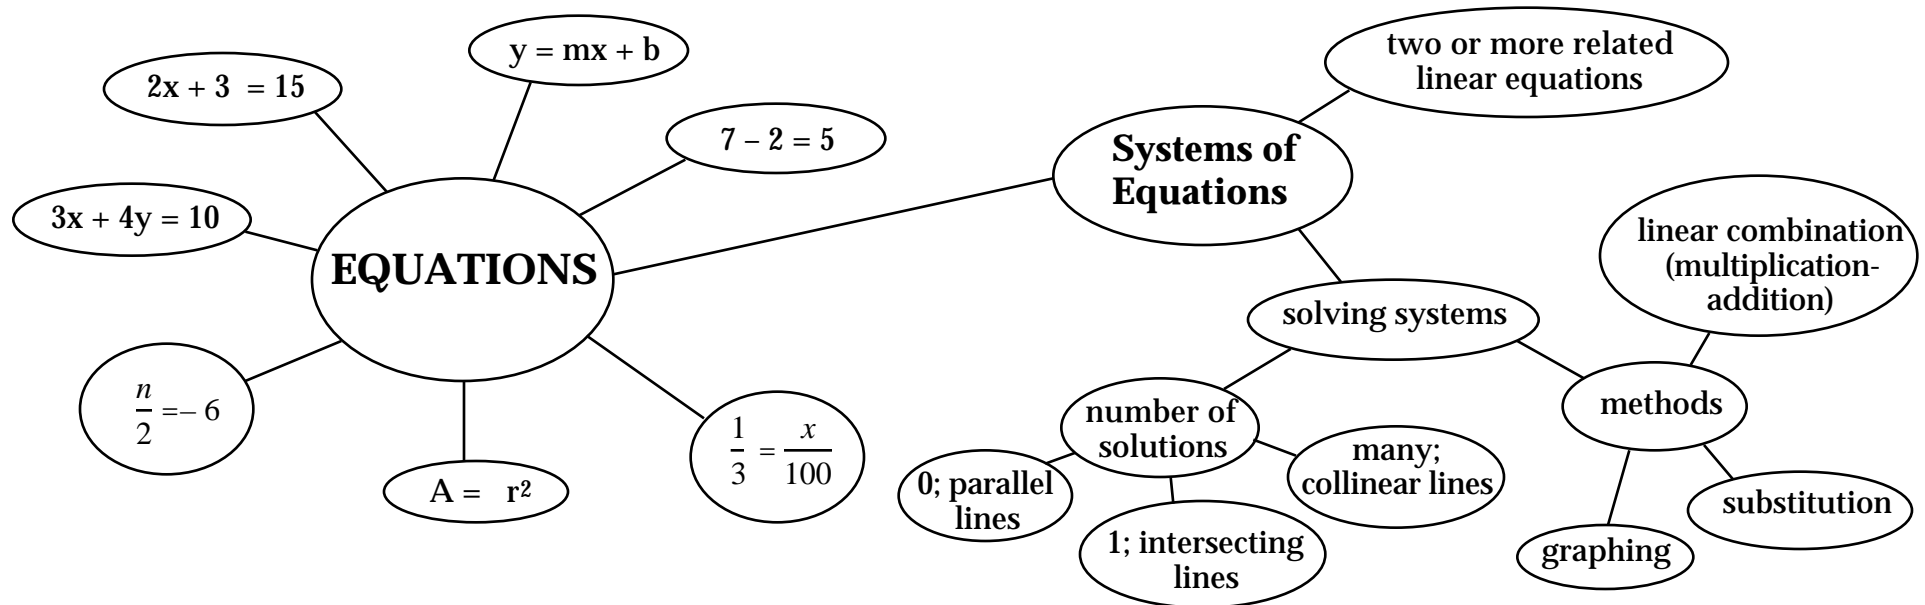

An expression is a mathematical phrase that uses numbers, variables, and/or operations.

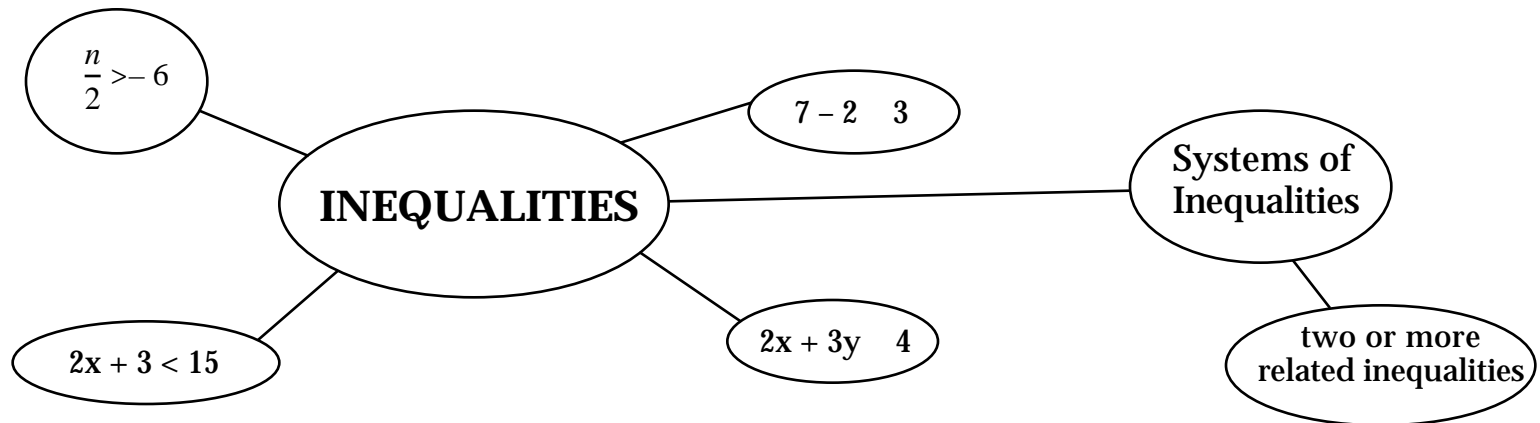

# EQUATIONS and INEQUALITIES

**An equation is a sentence that has two equal mathematical expressions.**

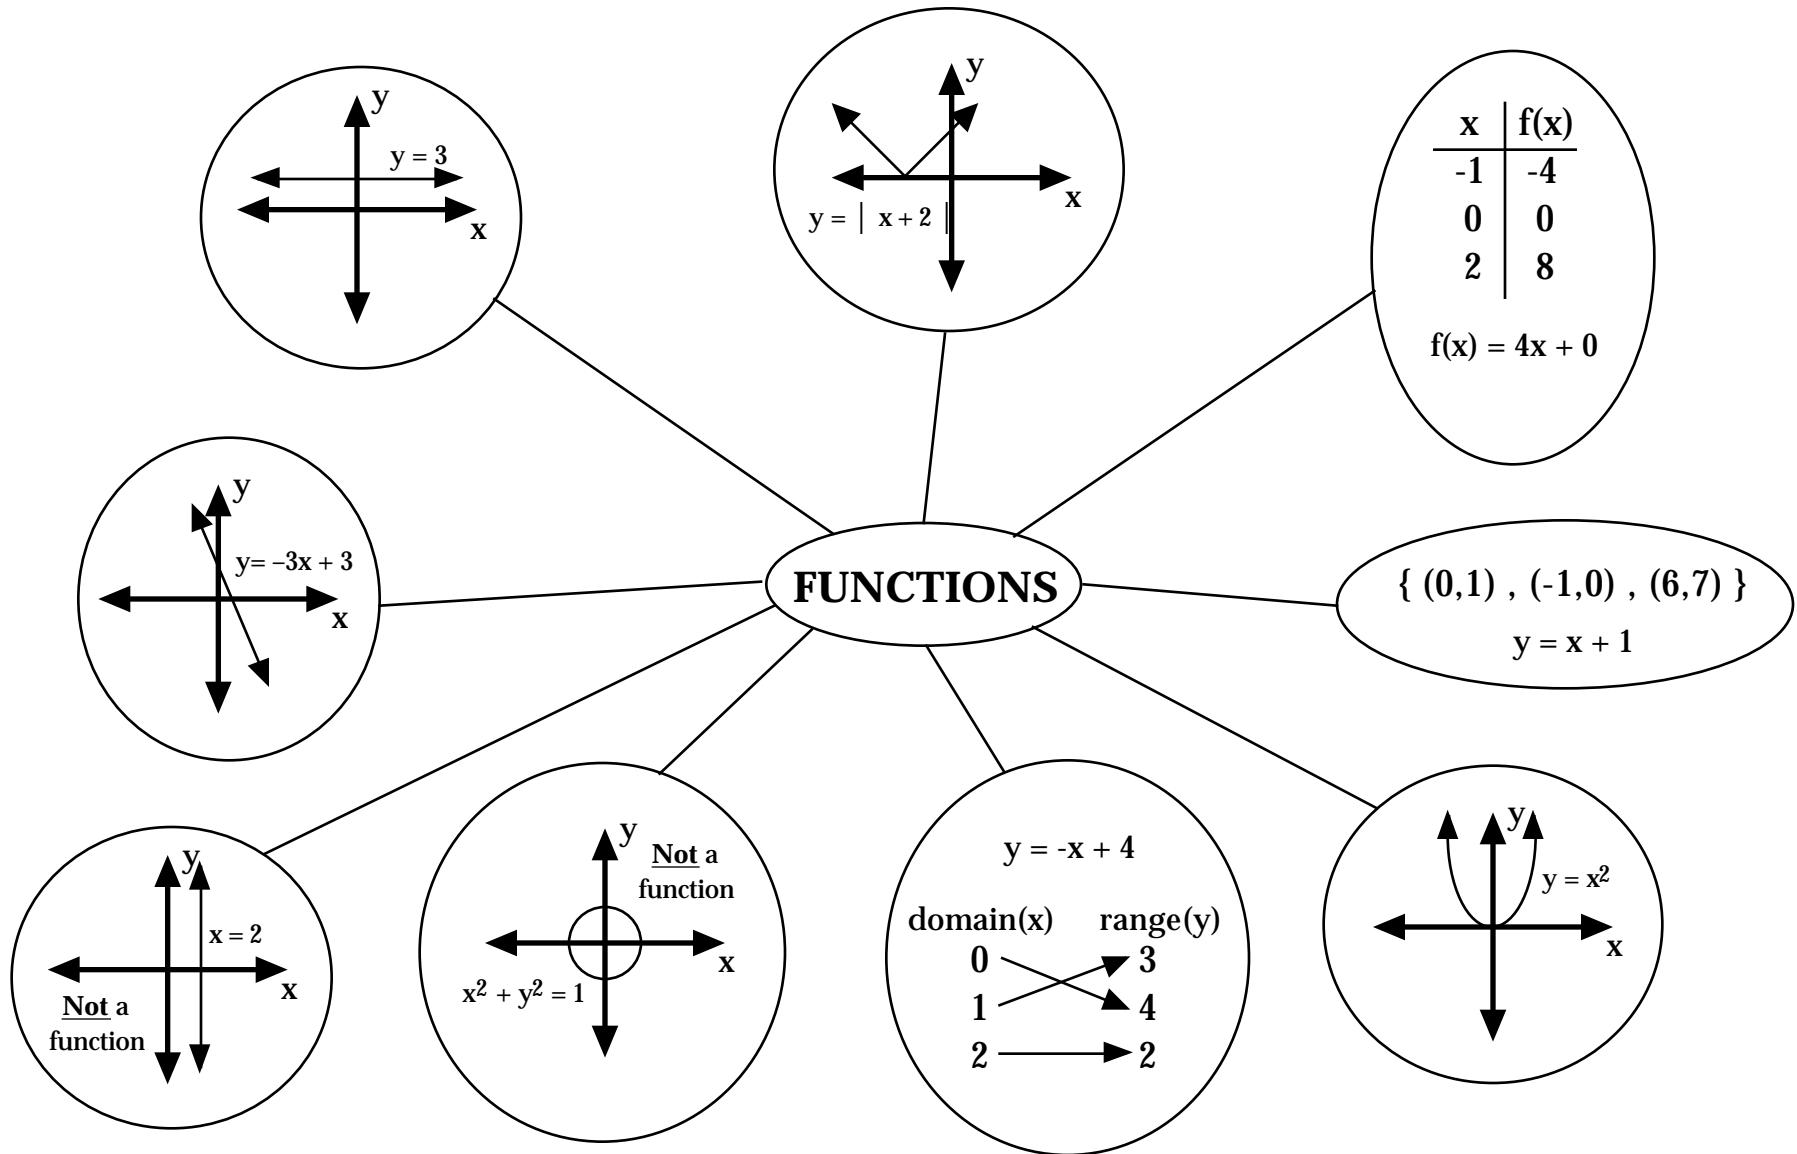

**An inequality is any mathematical sentence that is not an equation.**

# FUNCTIONS

**A function is a relationship in which the value of one variable depends on the value of another variable; each first value may be paired with one and only one second value.**

# RATIOS, RATES, and PROPORTIONS

**A ratio is a comparison of two of the same measurements.**

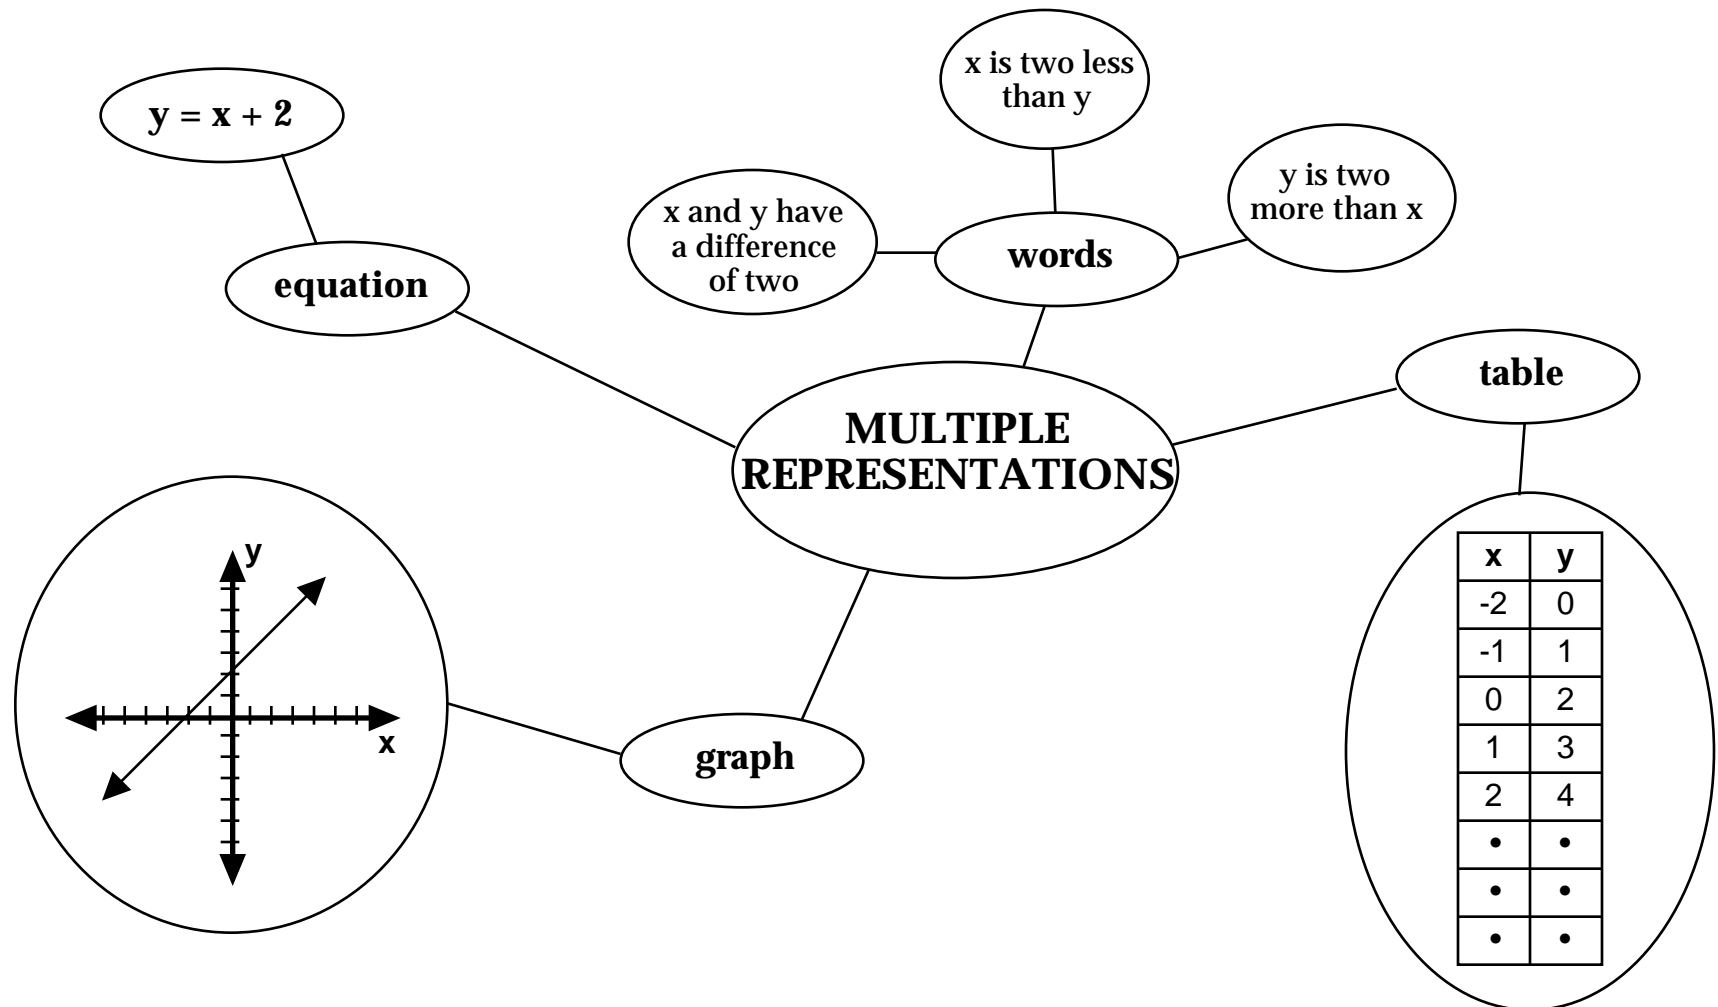

**A rate is a comparison of two different measurements.**

**A proportion is a comparison of two equivalent ratios.**

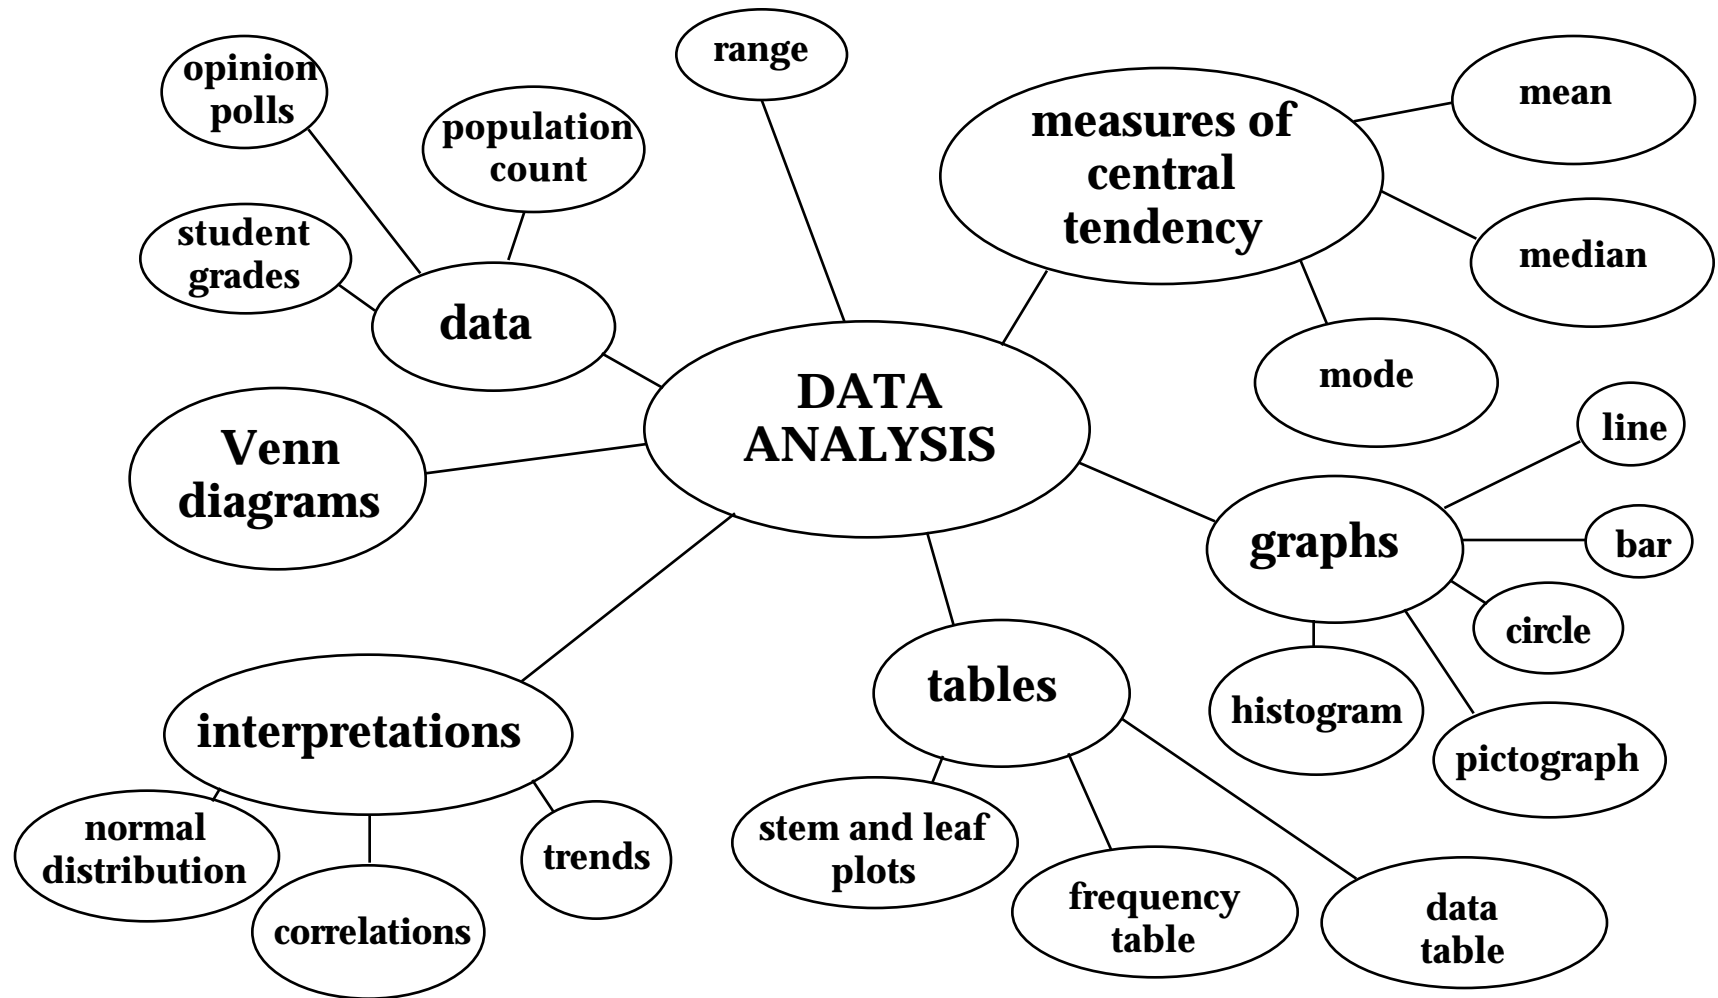

# MULTIPLE REPRESENTATIONS

A single mathematical concept can be represented in a variety of forms such as symbols, words, graphs, tables, and equations . . .

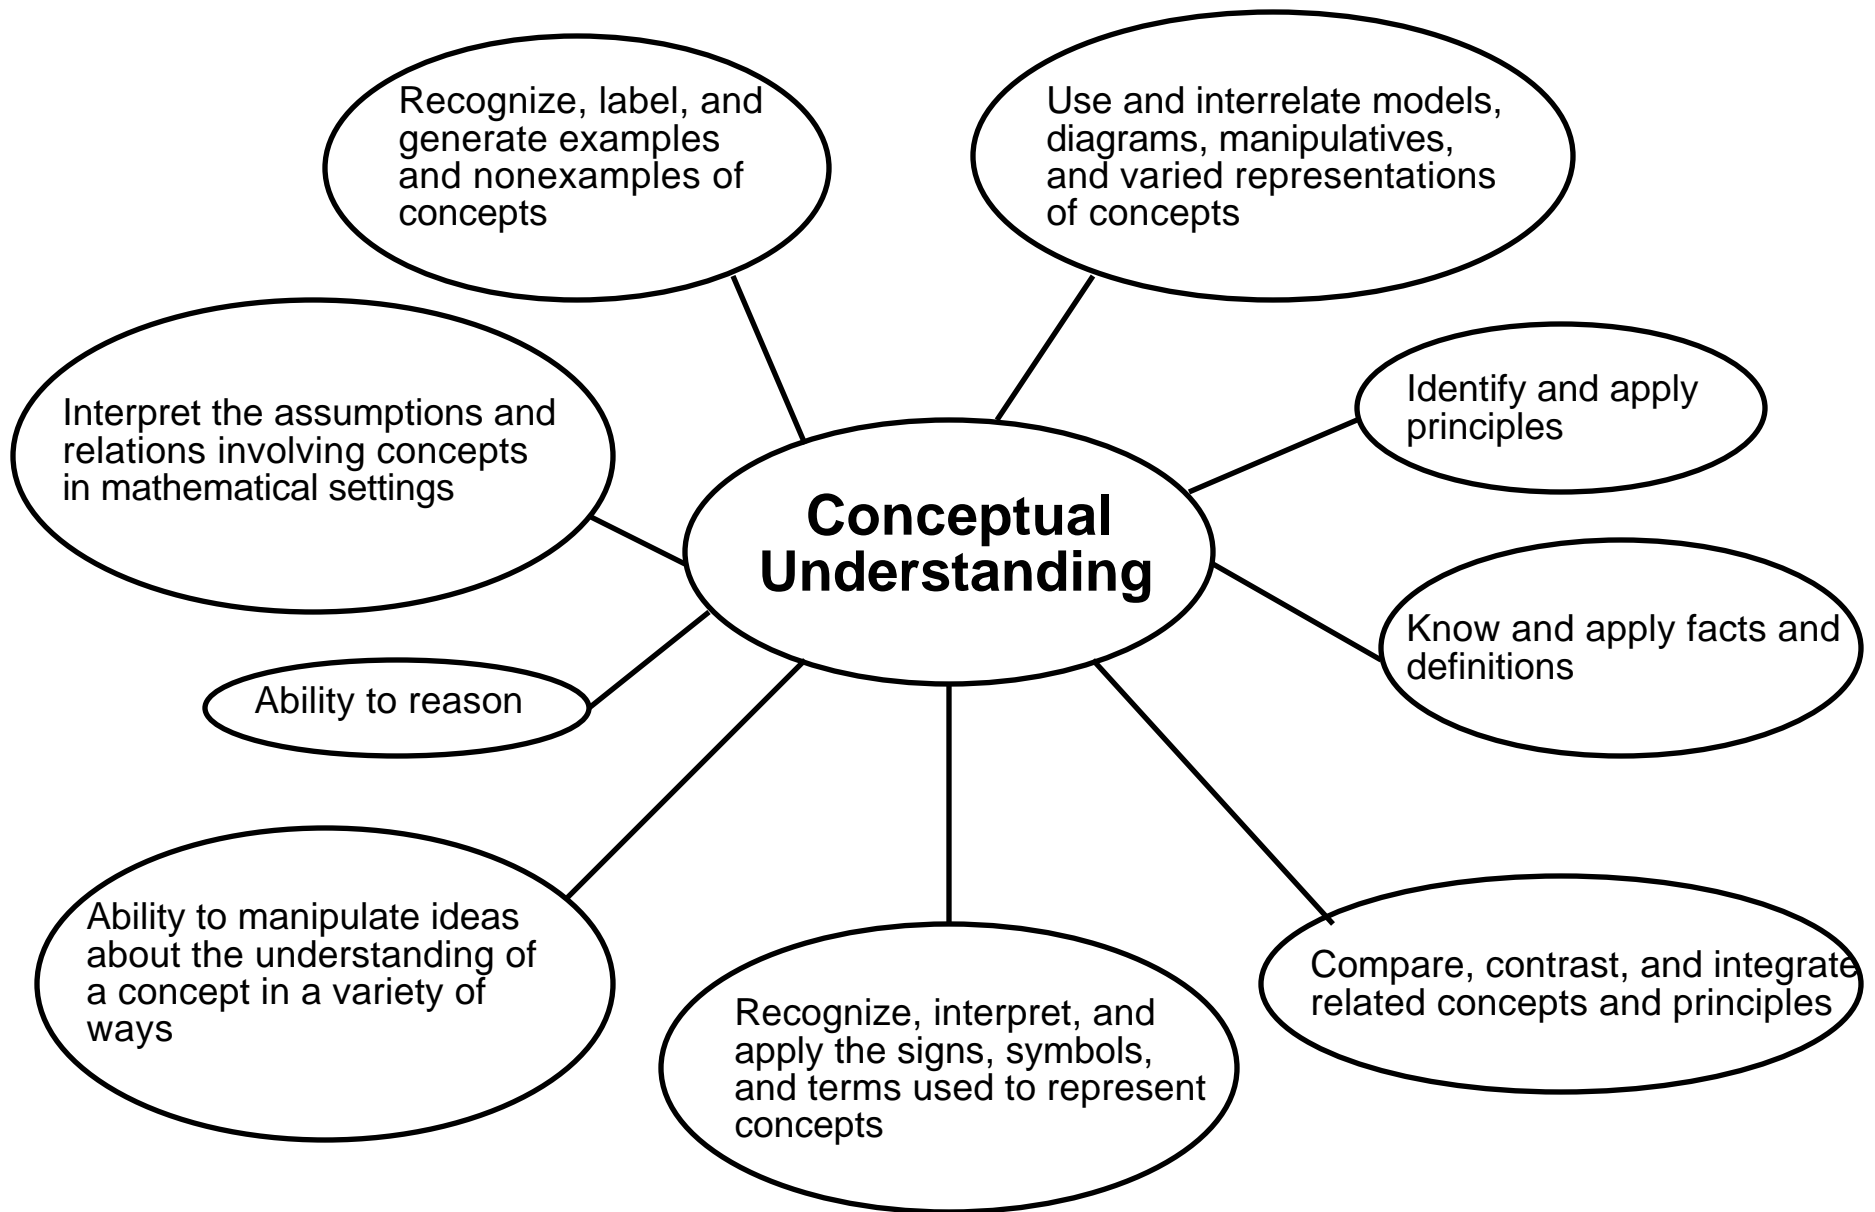

# DATA ANALYSIS

The collection and organization of information into a form that is easily understood.

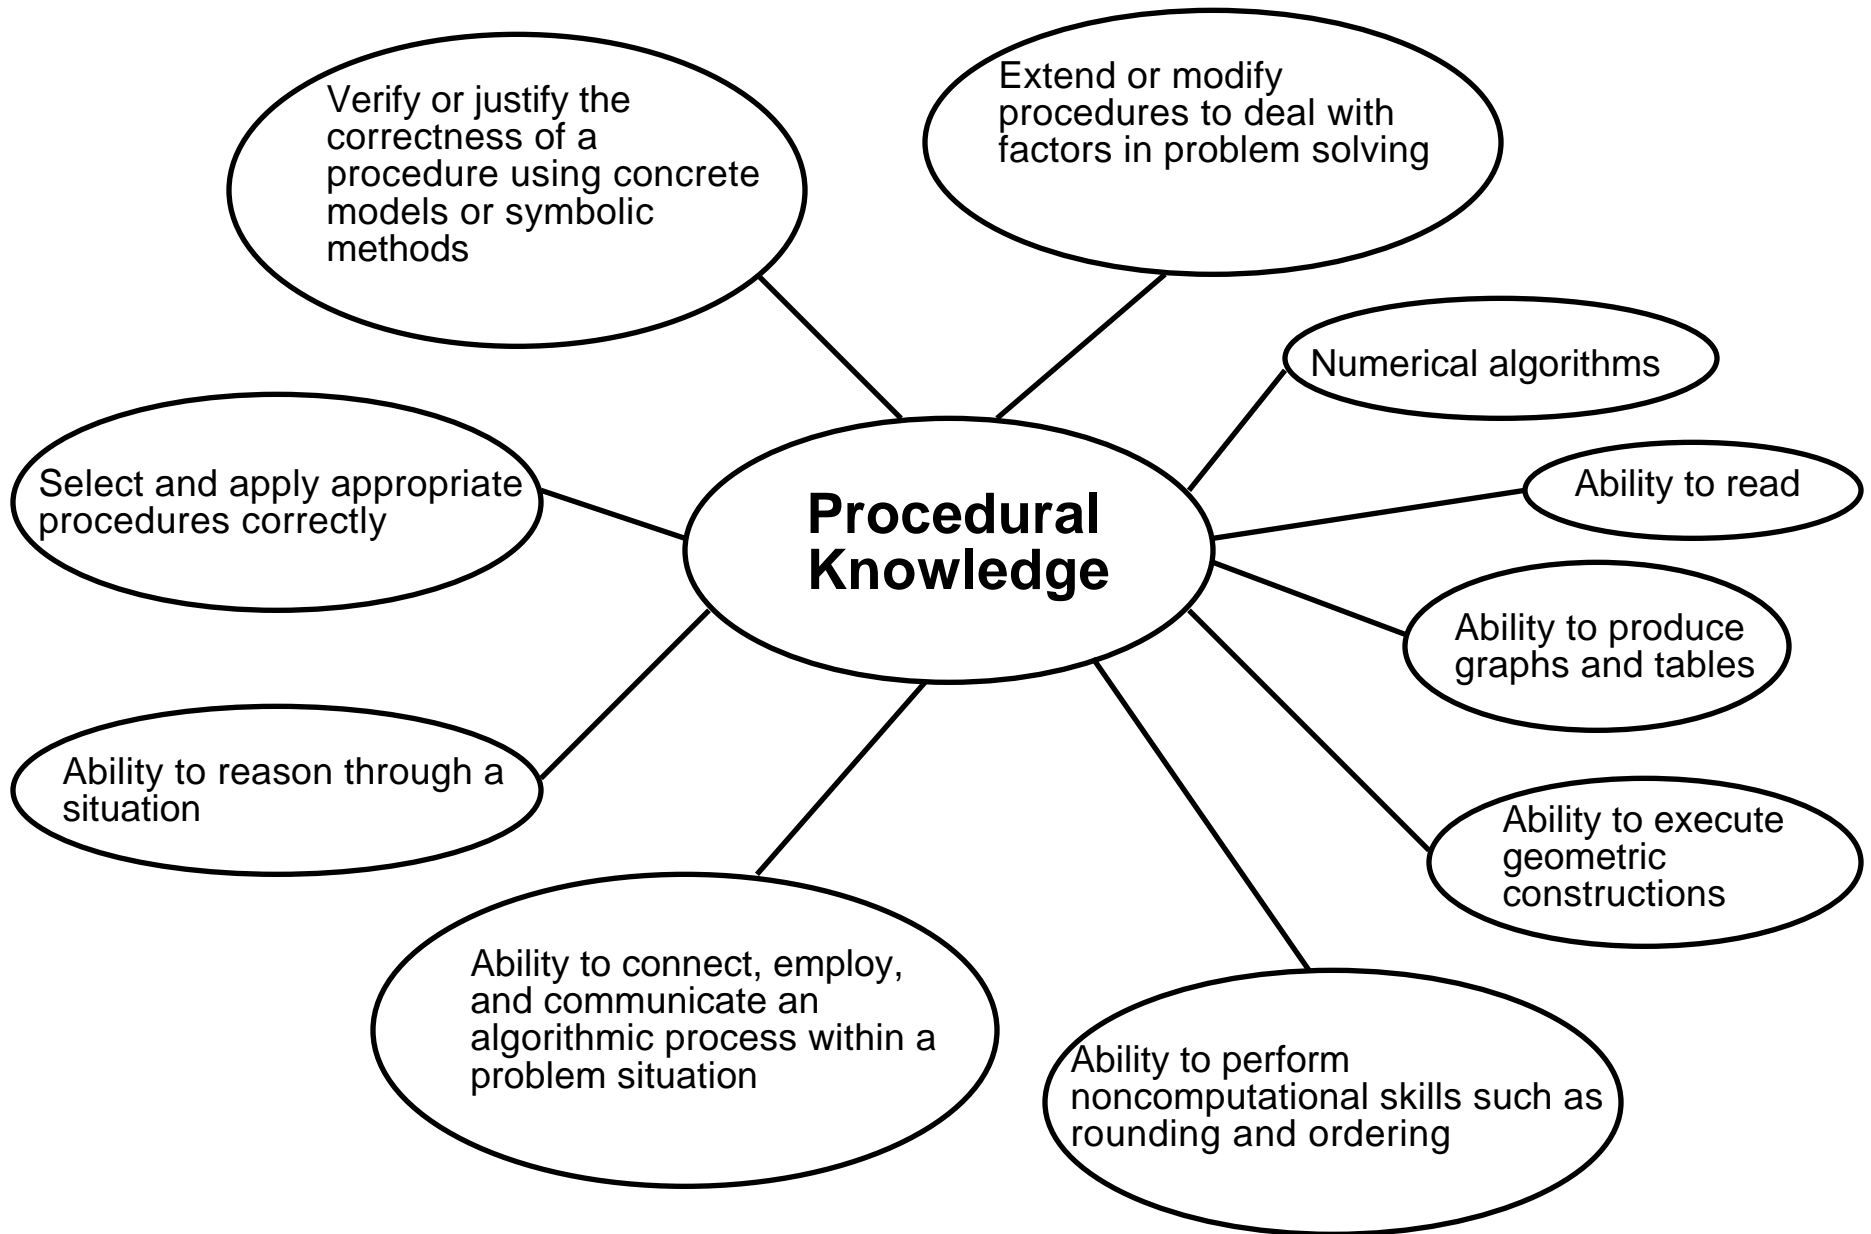

# MATHEMATICAL ABILITIES

# Mathematical Abilities

# Mathematical Abilities

## BLOOM'S TAXONOMY of the COGNITIVE DOMAIN

Mathematics

**LEVEL I = 50% EL 40% MS 35% HS**

**LEVEL II = 50% EL 60% MS 65% HS**

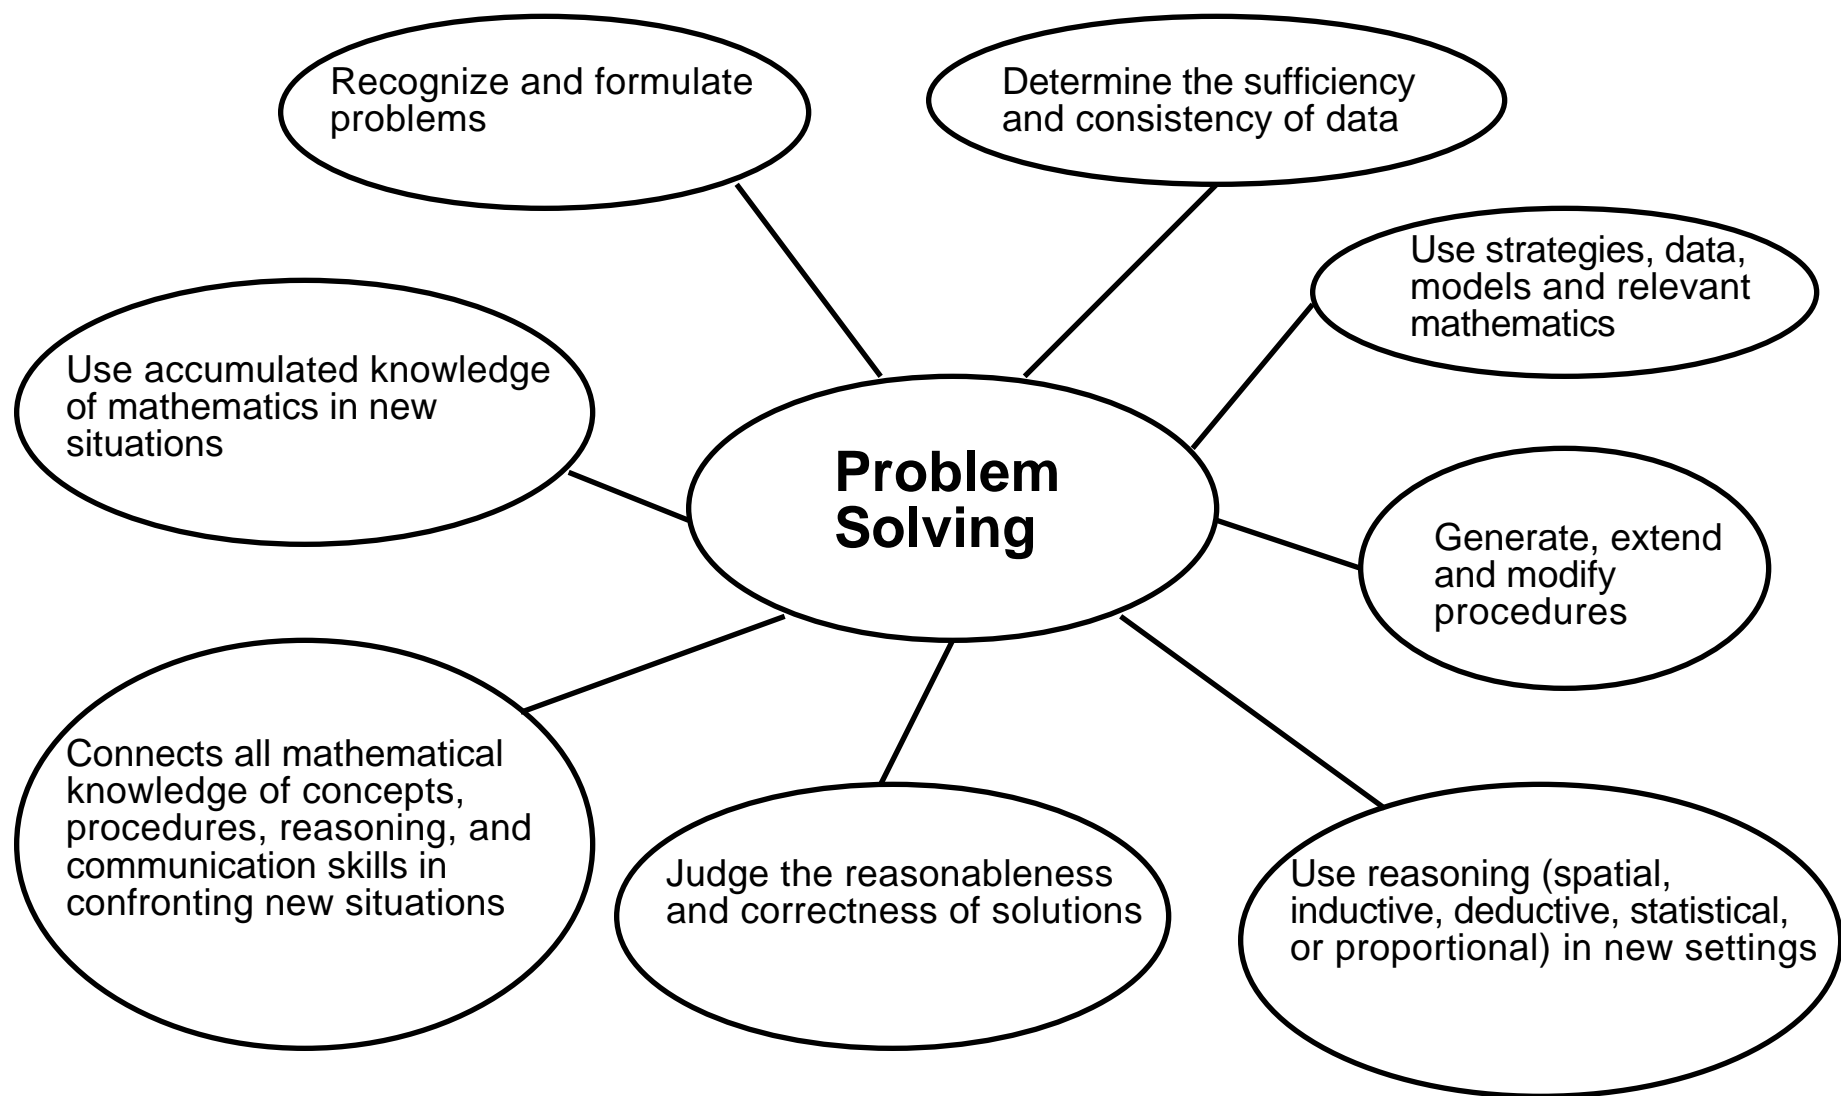

| <b>Knowledge</b><br>Ability to recall previously learned facts, concepts, or principles.   | <b>Comprehension</b><br>Ability to translate previously learned information, or to grasp meaning, intent, or relationships.  | <b>Application</b><br>Ability to apply previously acquired knowledge or information to a new situation.   | <b>Analysis</b><br>Ability to break material down into its components so that organizational structure may be understood.  | <b>Synthesis</b><br>Ability to analyze the parts and put them together for form a whole.   | <b>Evaluation</b><br>Ability to make judgments based on evidence and determine the value of material based on definite criteria.  |

FCAT uses only two classifications of cognitive skills. Level I includes the knowledge, comprehension, and application (in familiar situations) categories, and Level II includes the application (in unique situations), analysis, synthesis, and evaluation categories.
