

P-4 Model for Technology Integration.

You can integrate technology at one or more of the following stages:

1. Planning and Preparation
2. Presentation
3. Process
4. Product and Publication

Here are some quick ideas we reviewed in the presentation for Planning and preparation:

- Topic and search
- ReadWriteThink Lessons
- Website I've heard about
- Idea I had...

How do I plan my lesson? What topic interests me? What information exists on the Internet? How can I find information to add to my lesson?

Here are some ideas for Presentation:

- What websites can I use to present info to students?
- Do I have to create my own presentation tool? (PowerPoint example)
- What technology can I use to enhance my presentation? Elmo, LCD, etc.

Here are some ideas for Process (involve the students):

- What websites can students use for information?
- What websites can students use for practice?
- What forms of technology can students use—video, audio-recording, digital photos, PowerPoint, etc.
- Shared Writing example: [We Went Walking](#)
- [Fractured Fairy Tale Creator](#)

Here are some ideas for Product and Publication:

- Zines for Kids
- How does it use technology?
- Does it use the best tool for the job?
- Evaluation?
- How publish?
